

Right-of-Way & Easement Process

Right-of-Way:

A right of passage over another person's ground

Easement:

A legal agreement that allows an individual (company/business) to use another person's property.

- 1 AES Ohio evaluates potential routes and proposes routes that minimize impacts on property owners to the extent practical.
- 2 Once a preferred route has been approved by the Ohio Power Siting Board, AES Ohio will contact affected property owners to explain where the electric pole line will be located and request an easement.
- 3 AES Ohio construction contractors will mitigate and restore any property damaged during the construction process.
- 4 Property owners can continue to use the property in any manner which is not inconsistent with the operation and maintenance of the electric pole line.
