

Millcreek to Customer 138kV

Transmission Line Project 1A

PROJECT NEED

AES Ohio is investing in network enhancements driven by customer projects in the area.

These enhancements will serve the new load and strengthen the electric network in the northern region of AES Ohio's service territory.

What the network enhancements will provide

01	02	03
INCREASED CAPACITY	GREATER FLEXIBILITY	ENHANCED RESILIENCY
Support the new load associated with customer projects in the area.	Improve the network's ability to serve evolving customer and system needs.	Strengthen service to the northern region of AES Ohio's service territory.

BOTTOM LINE

Millcreek to Customer 138kv Project 1A is needed to serve new customer-driven load while increasing capacity, flexibility, and resiliency across the regional network.
