Tipp City – Network Improvement Project

AES Ohio is proposing upgrades to the local power grid, known as the Tipp City Network Improvement Project (the "Project"), and is investing in the electric transmission system to improve the resiliency and reliability, increase operational flexibility, and to meet the requirements of the surrounding transmission network. The Tipp City Network Improvement Project involves constructing approximately 1.5 miles of new single-circuit 69kV transmission line from the existing AMP-Transmission (AMPT) owned Canal Substation, to the existing AES Ohio-owned Miami Substation.

What

The Project includes :

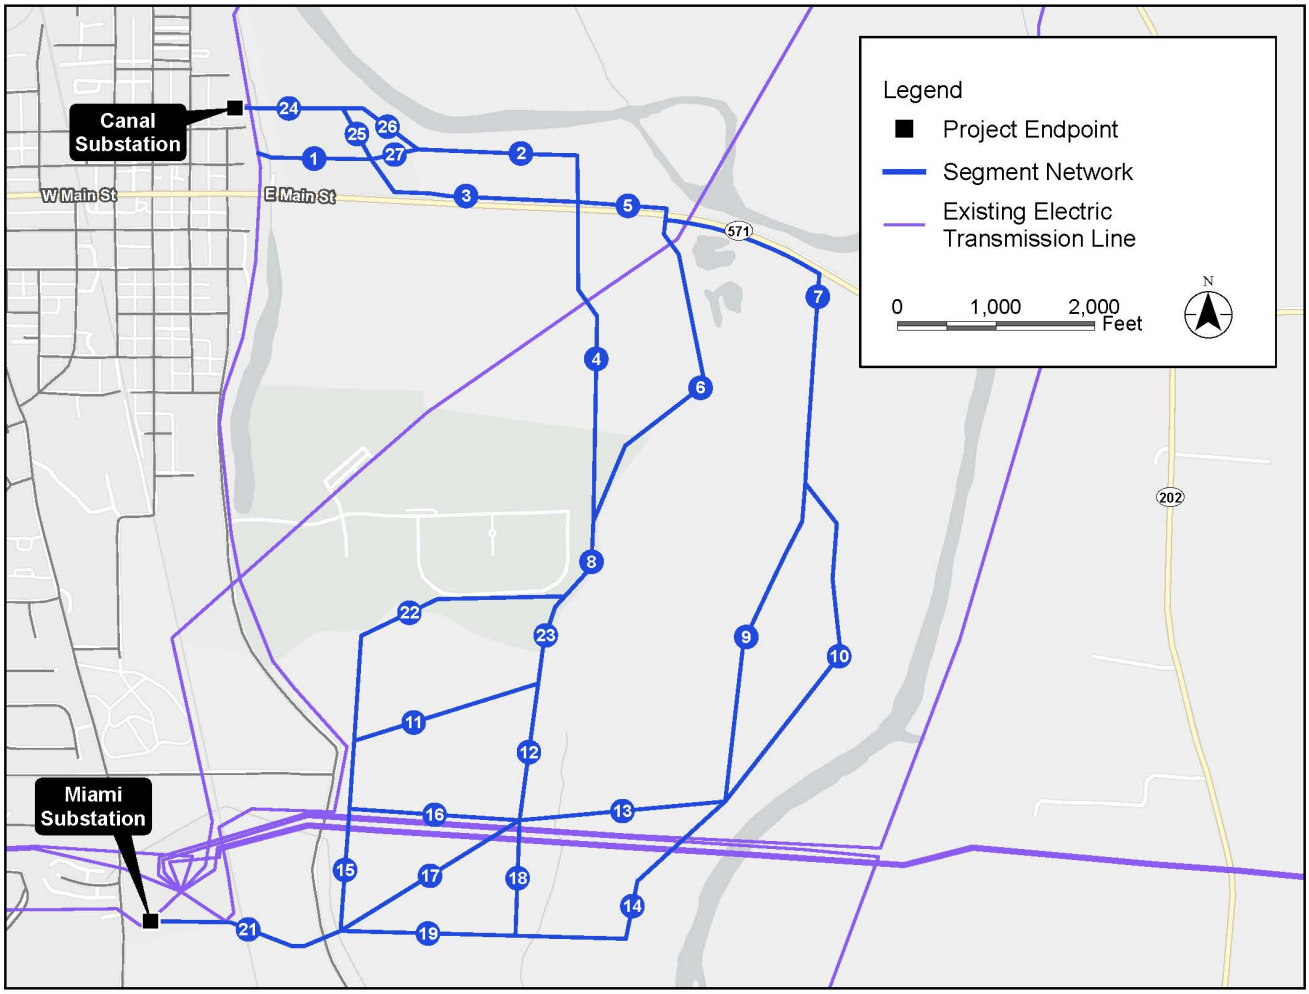

- Building approximately 1.5 miles of single-circuit 69kV transmission line from the existing Canal Substation, to the existing Miami Substation near Tipp City, Ohio.

Why

The proposed Project is in response to reliability issues in the Tipp City area.

Where

- Miami County
- Tipp City
- Monroe Township

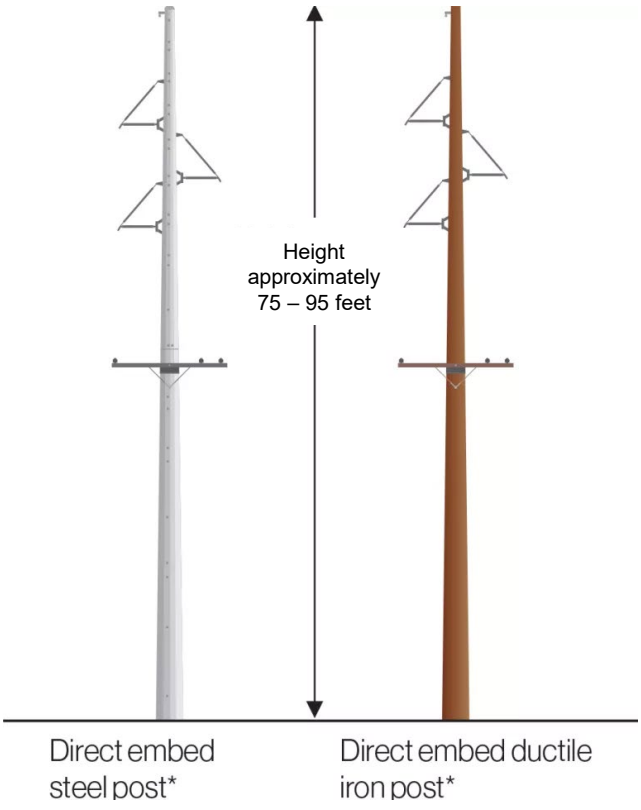

Tipp City – Network Improvement Project

Schedule*	2026	2027	2028	2029
Planning/Siting May 2026 – February 2027				
Project Announcement and Open House October 2026				
Field Surveys and Engineering October 2026 – August 2027				
Right-of-Way (ROW) Communications January 2027 – August 2027				
Facility Construction April 2028 – February 2029				
ROW Restoration February 2029 – May 2029				
In Service June 2029				

*Schedule is preliminary and subject to change.

Typical Structures

The Project involves the use of self-supporting steel and ductile iron poles on foundation with heights ranging from approximately 75 - 95 feet with an approximate ROW easement width of 25 - 50 feet.

*Final structure height, structure type, and ROW easement width may vary.
