Thank you for your request for a nightguard light. AES Ohio welcomes the opportunity to offer this service to our customers. We are confident you will enjoy the added security the light provides. There is no installation charge.

Please draw your request on the second page of this form. Then fill in the blanks below.

Units	Number Wanted	Estimated Monthly Cost Each ¹	Total Cost
Initial Nightguard Lamp - (3600 lumens) LED, est. 90 ft. diameter (Residential)			
Initial Nightguard Lamp - (8400 lumens) LED, est. 130 ft. diameter (Nonresidential)			
Each Additional Lamp (3600 lumens) LED			
Each Additional Lamp (8400 lumens) LED			
Overhead Span (wire from pole to pole) (maximum length 100ft)			
Underground Span (customer must provide the trench)			
Wood Pole			
			Total Cost \$

¹The values listed above are estimates of the monthly cost of nightguard service as of January 1, 2023. The monthly cost shall be based upon the rates and riders listed as part of Tariff D23.

Nightguards cannot be installed if any of the following conditions exist:

- We need to install the pole by hand. Truck access is required.
- We need to install a transformer to power the nightguard(s).
- We need to trim or remove trees.
- You request that we install nightguards on customer poles or buildings.

After we receive your drawing, we will contact you if any of the above situations exist.

By signing this application letter, you are agreeing to keep and pay for the light(s) for at least two years. Return this letter to the address below. Lights will be installed 90-120 days after receiving your request.

For questions, please call AES Ohio at 800-424-5578 or 937-331-4860

Mail this form to: AES Ohio
 Attn: Construction Control Center
 1900 Dryden
 Dayton, OH 45439

or email completed form to aesohioconstructionapps@aes.com

(Complete second page, please)

REQUIRED

Please draw a diagram with the following information:

1. Location of your house and other buildings, including property lines.
2. Street names, driveways, alleys. Add directions if helpful (N, S, E, W).
3. Mark an X for existing AES Ohio poles (include metal pole tag numbers).
4. Mark a PX for any proposed new poles. Please put a stake in the ground.
5. Mark which direction you want the nightguard(s) to face.
6. Note where trees are located.
7. Draw a line from the existing AES Ohio pole that will run to the new pole(s).
If you request an underground line, you are responsible for trenching and restoration. You must notify "OUPS" prior to trenching at 1-800-362-2764.

Use these symbols in your drawing

PL = Property Line

X = Existing Pole

PX = Proposed Pole

D = Nightguard

Please indicate with a D if the area can be accessed by truck (trucks must stay on driveways, roads or dry ground).
